

CONTE PLASTICS

(USA) 54mm painted soft plastic figures.

These superbly sculpted and magnificently cast figures and accessories have set a standard for excellence in the toy soldier market. They rank alongside Matchbox, Accurate, Barzso and Elastolin as the best toy soldiers ever made. The very essence of our favorite action/adventure films, they sprang upon the toy soldier scene like Venus, fully realized and strikingly beautiful, a remarkable achievement.

Ancient Greece

Conte has produced the finest plastic Spartans we've ever seen. Glorious, heroic, magnificently sculpted, with socketed arms which allow every figure to be posed.

There are 9 sets of Spartans. Each set includes 7 figures. 5 of these figures are found in all 9 sets. Each set also contains 2 unique poses not found in the other 8 sets.

As you can see on this page, almost every figure presents numerous possibilities for being posed in different action positions. Thus you can have the same figures attacking, defending, being ready for action or advancing. When choosing which sets to paint, please call to discuss your ideas with Jamie.

Painting Options

Like all Conte figures, we are offering these figures in hand-painted form, decorated in authentic outfits drawn from illustrations in a variety of Osprey books. As each Greek city state fielded its own army, we are offering a number of different different paint jobs. In addition, each set is available in 2 styles: super-detailed (in which the shield and helmet crest are intricately decorated) and full (in which the shield and crest are simply painted):

- a) **Spartan Army** - painted in a unified "look" of their standing army.
- b) **Athenian Army** - painted in a unified "look" of their standing army.
- c) **Greek Light Infantry** - each with armor, helmet plume and shield painted in a completely different design.
- d) **Greek Hoplites** - each with armor, helmet plume and shield painted in a completely different design.
