

# EDIX (France) Modular wooden castle building system.

This easy-to-assemble modular wooden castle building system was designed for children but is accessible to even the most experienced castle fans. By combining pieces from the infinitely expandable system, you can build the castle of your dreams. The one shown below measures 8 x 6 feet!

### Basic Castles

If you're looking for a nice castle, stop and shop here. If you want a more elaborate one, start with one of these and add on from the expandable Edix system.

### Small Starter Castle

EDX500 (shown above at left with 90mm figures to show scale) Rectangular castle with drawbridge gate, courtyard, 3-story tower, crenelated walls with parapets for firing down on attackers...\$ 65.00

### Large Starter Castle

EDX501 (shown above) This rectangular castle is 30% bigger than the smaller version. Includes a drawbridge gate, courtyard, 3-story prison tower, 2 different 3-story crenelated towers, crenelated walls with parapets for firing down on attackers. .... \$ 100.00

### Wall add-ons

Use these to increase the dimensions of your castle walls. (Please note: each wall must slot into the next section using 1 track and 1 post - it's similar to building a Brio train setup)

#### Straight Tracks and Posts
