# EXPEDITIONARY FORCE NAPOLEONICS!

(China) 54mm unpainted semi-soft plastic figures.

Expeditionary Force makes the best toy soldiers in the world. Each time they release a new range of figures, it immediately resets the standard for sculpting, detail and realism in the historical era to which they have turned their attention.

Now they are bringing out their own line of the Napoleonic Era (which also includes the Battle of New Orleans). These new sets include infantry, cavalry and artillery units. What we present here will be expanded in the future.

All sets require simple assembly with glue (we use Gorilla Super Glue), but that's because every box comes with extra arms and weapons which allow for much customization.
